Rain Experiment

**Make it Rain!**

Step 1: \*You will need a clear container, shaving cream, and blue food coloring. Fill a container with water.

Step 2: Squirt shaving cream on top of the water to create a cloud. Have students predict how many drops it will take before it "rains".

**When will it rain?**

When a cloud gets full of water droplets, the cloud becomes heavy and the water droplets fall to the ground as rain. Predict how many drops it will take to make it rain.

My observation: \_\_\_\_\_

My Prediction: \_\_\_\_\_
